

# ControlD

Hosted on: Unifi Cloud Gateway Ultra

IP: 192.168.1.1

The ControlD application is installed on this router to manage DNS.

## Install

1. SSH into router
  1. Docs: <https://help.ui.com/hc/en-us/articles/204909374-Connecting-to-UniFi-with-Debug-Tools-SSH>
2. Run command: `sh -c 'sh -c "$(curl -sL https://api.controld.com/dl)" -s cuayo73hcv forced'`
  1. The resolver ID here "cuayo73hcv" comes from the ControlD Endpoint dashboard

Instructions from here: <https://docs.controld.com/docs/ctrlid#quick-install>

## Upgrade

1. SSH into router
2. Run command: `/data/controld/ctrlid upgrade`
  1. Can also run the install command again leaving off the "-s XXX forced" arguments
